

AltraWash Blue™ Helps Maintain Print Quality

CASE STUDY

HARPERSCIENTIFIC
DIVISION

“Clean anilox rollers help us reduce our make ready times and help maintain print quality”

by Chris Thomas, Cadmus Whitehall/Flexo Pressroom Supervisor

Cenevo, Inc. is the third largest graphics communication company in North America. The Company is a leading provider of print and visual communications, with one-stop services from design through fulfillment.

Cenevo's broad portfolio of services and products include commercial printing, envelopes, labels, packaging, publishing and business documents delivered through a network of production, fulfillment and distribution facilities throughout North America.

“To maintain our print quality, we have been using HarperScientific's AltraWash Blue in our Flexo Wash unit to clean our anilox rollers and sleeves for the past four months with complete satisfaction”, says Chris Thomas the printing supervisor at Cadmus in Charlotte, NC.

They print with both UV and water based inks and found the AltraWash Blue cleaned both. Thomas adds “Clean anilox rollers help us reduce our make ready times and helps maintain our print quality”

Aluminum Safe Ink Cleaner

AltraWash Blue is a concentrate they diluted with water to meet their particular cleaning requirements and used less chemical than they did with their previous cleaner. The unit stayed clean without leaving any residue in the processing tank and the unit's filter extracted the ink solids so the chemical holding tank did not retain sludge.

For additional information on the AltraWash Blue™ ink cleaner, please call 866-588-8686 or visit www.harperscientific.com
